

Romwell soft sheets are comprised of a few particularly soft and flexible layers of corrugated cardboard, which are laminated onto one another. This enables the soft sheet to be used not only as an intermediate layer, but also to wrap sensitive packaged products. As in the case of other romwell sheets, numerous special dimensions and equipment with self-adhesive lines are possible. The standard soft sheet is available with three different perforations.

Soft sheets

Usage of soft sheets

Perforated strips are easy to separate and bring into any desired form.

Technical data of soft sheets

	Minimum	Maximum
Length (corrugation direction)	50 mm	2.400 mm
Width	50 mm	1.200 mm
Thickness	10 mm	21 mm
Perforation	50 mm	2.400 mm

Technical options

- Perforation
- Can be combined with other shaped parts
- Self-adhering
