

# Usage instructions

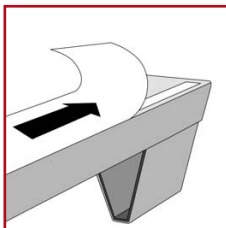

## VEGA pallet skids

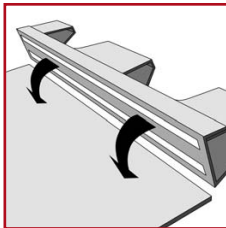

### Correct

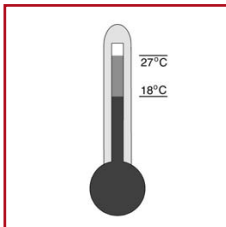

*Do not touch the adhesive lines!*

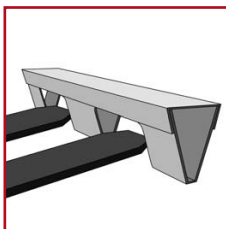

*Protect the adhesive lines against dust and soiling!*

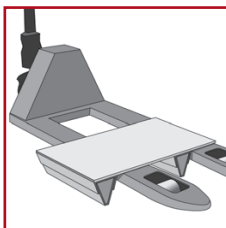

*Only apply the VEGA skids in the desired position on boxes and formats. Do not adhere directly onto the packaged material!*

*Process at room temperature. Use at temperatures below 5°C should be avoided entirely.*

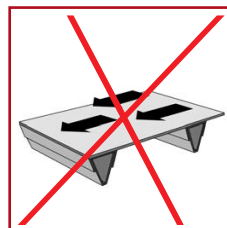

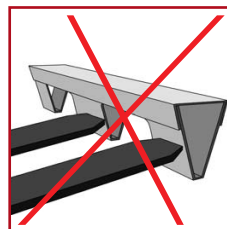

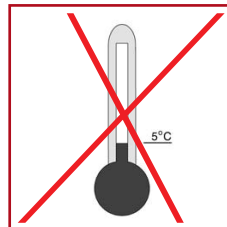

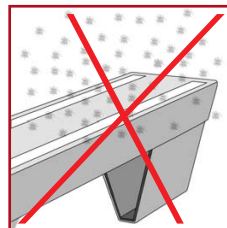

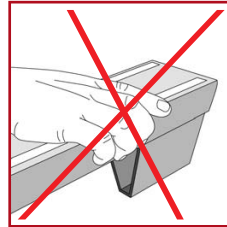

*The VEGA skids can be handled using any industrial truck or fork-lift truck. The forks should be inserted precisely in the intended spaces. This avoids damage to the skids.*

*VEGA pallet skids should only ever be moved using lifting equipment (industrial truck, fork-lift truck, etc.). Sliding - particularly on non-slip surfaces - must be avoided.*
